

# WET WELL WIZARD

**BEFORE**

**12" FOG MAT IN 12" DIAMETER WET WELL**

**AFTER**

**2 WEEKS LATER**

Olympia Washington Wet Well

IER Environmental Systems did a two-week trial at the City of Olympia Liftstation containing a 12" Fats, Oils, Grease mat (FOG). Our team installed this one aerator system (115 VAC, 60 Hz, 1 Phase) system on a 20 amp breaker and ran the system for two weeks. At the end of the trial the wet well not only eliminated the FOG mat, the odor within the wet well started to decrease.
